

Preparing for recovery

- What's at stake?
 - Confusion, delay, damage (environmental, psychosocial, socio-economic), loss of trust
- Recent advances
 - Recognition of importance within full risk/incident management cycle, recovery planning in UK, international frameworks, citizen science
- Improvement areas
 - Exercising, food management, comms, knowledge management
- What more could be done?
 - Strategy and plans, integrated risk assessment/all hazards approach, build resilience, exercising and training
- Learning from Experience
 - Polonium, Chernobyl, Fukushima,
