

# Lu-177: Our promise to the global health care community

Harrie Buurlage

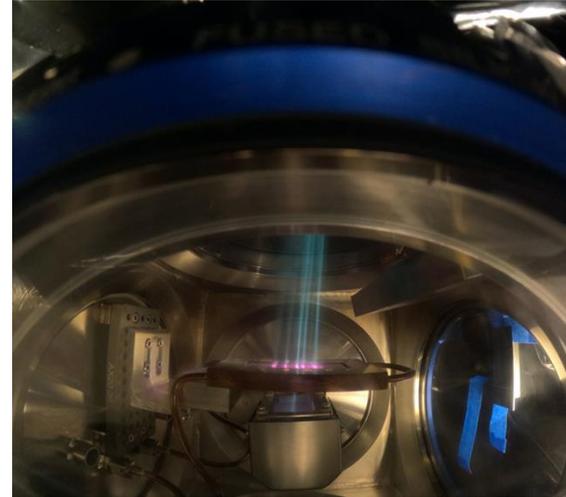

Chief Commercial Officer, Isotopes  
General Manager Europe

SHINE

October 2023

## — Our promise to the global health care community

- ✓ Removes the dependency on Russia for enriched Yb-176
- ✓ Decreases dependency on ageing and capacity constrained high flux research reactors
- ✓ Decreased costs of production
- ✓ A future with nca Lu-177 produced all on one site (full internal integration)

## — The path to eliminating barriers

### *Risk-reward ratio as a constantly moving target*

- ✓ Assure any governmental subsidies do not disturb the market (fair level playing field)
- ✓ National governments should withdraw from areas where private solutions have demonstrated adequate sustainable solutions

### *Maintaining credibility as a break-through innovator*

- ✓ Appreciate and support first-of-its-kind technologies especially when they hold key game changing future promises
